用 Sketch 设计响应式网页

CJH 2018-08-06

一、安装 Anima Sketch 插件

Anima 插件官网:http://launchpad.animaapp.com

To Responsive Html:

https://www.youtube.com/watch?v=00Hjzw9_YLs&t=1105s&frags=pl%2Cwn

https://www.youtube.com/watch?v=E3xZui2myUU

两个已发布的测试网站:

https://launchpad.animaapp.com/autoResponsive

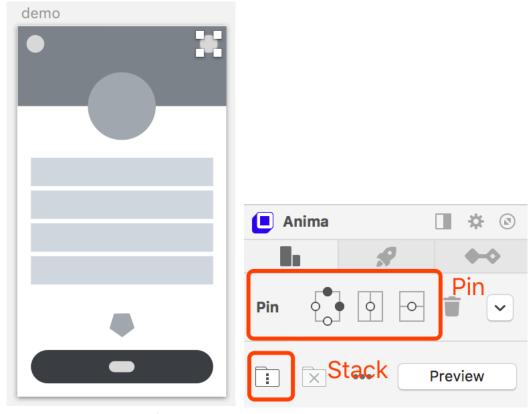

https://launchpad.animaapp.com/autoweb

GitHub:

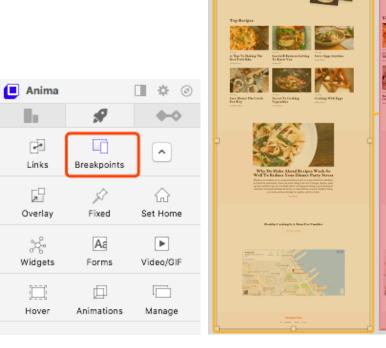

https://github.com/AnimaApp/Auto-Layout https://github.com/AnimaApp/Launchpad

二、用 Anima 插件设计布局

(1) 使用 pin 和 stack 进行定位(注意嵌套的 symbols 内部也必须使用 pin 或 stack)

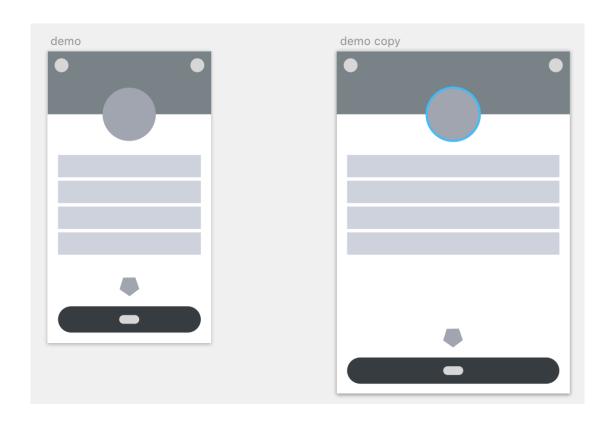

(2) 用 Breakpoints 进行多分辨率适配

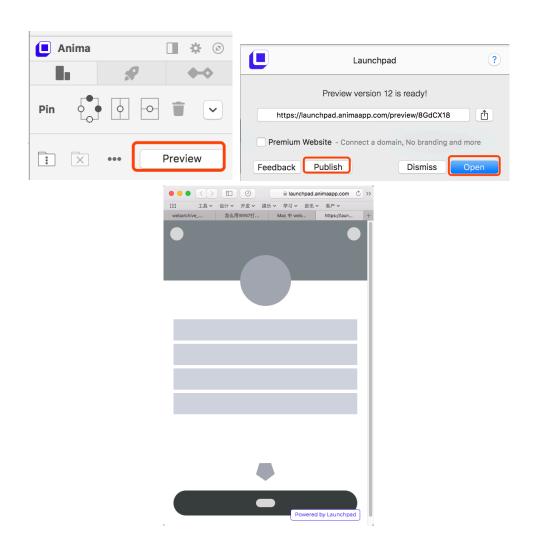

(3) 其它功能:

| 名称 | 说明 |
|-------------|-----------------------------|
| Links | 网页跳转 |
| Breakpoints | 网页分辨率自适应切换 |
| Overlay | 浮动层 |
| Fixed | 固定位置? |
| Set Home | 设置选中 Artboard 为主页 |
| Widgets | 三方 Widget 插件,如 google 地图 |
| Forms | 将选中元件用 web 表单控件替代(输入框/提交按钮) |
| Video/Gif | 将选中元件用视频动画替代 |
| Hover | 浮动? |
| Animations | 动画? |
| Manage | 管理发布的网页 |

三、拉伸 Sketch Artboard 进行测试

四、预览网页并拉伸测试

五、保存网页并修改 html 文件

- (1) 建议用 chrome 保存网页,并用三方编辑器整理代码。
- (2) 可删除尾部免费版的浮动标签代码

```
<style type="text/css">
/*<![CDATA[*/
@import url('https://fonts.googleapis.com/css?family=Montserrat');.launchpadbanner-powered-by-launchpad{background: rgba(255, 255, 25
50px; width: auto; position: absolute; height: auto; margin: 0; top: 7px; font-family: 'Montserrat', Verdana, Arial, serif; font-weig
/*]]>*/
</style>
 <script src="./instacrap files/launchpad-banner.js" async="" type="text/javascript"></script>
 <a href="https://launchpad.animaapp.com/?utm_medium=user-website&amp;utm_source=anima&amp;utm_campaign=launchpad-banner"></a>
 <div class="launchpadbanner-powered-by-launchpad">
  <div class="launchpadbanner-title";</pre>
    <div class="launchpadbanner-titleBg"></div>
    <div class="launchpadbanner-label1";</pre>
      Powered by Launchpad
    </div>
  </div>
  <div class="launchpadbanner-extended">
  <div class="launchpadbanner-extendedBg"></div>
<div class="launchpadbanner-subtitle">
    Designers, launch<br />
    websites in Sketch.<br />
    <u>Start Free</u>
  </div>
 </div>
```

(3) 可删除部分 Head 代码

<!-- saved from url=(0051)https://launchpad.animaapp.com/preview/8GdCX18/demo --> link rel="shortcut icon" type="image/png" href="https://animaapp.s3.amazonaws.com/home/favicon.png" /> <meta name="author" content="Launchpad by Anima" />

(4) 保存并用浏览器打开, ok!
